

## Empathy Map Canvas

### 1. Rahul Sharma (Target Customer Persona)

Rahul is a 24-year-old software engineer based in Bangalore who frequently shops online but gets frustrated by session losses and unclear payment breakdowns.

|                                                                                                     |                                                                                              |
|-----------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|
| <b>SAYS</b><br>"I need a checkout screen with Indian pricing (Rs.) and transparent shipping costs." | <b>THINKS</b><br>"Are my details safe? Will the cart reset if I switch to check my account?" |
| <b>DOES</b><br>Reads user reviews, filters by category, registers using email, saves to wishlist.   | <b>FEELS</b><br>Frustrated by cart resets, reassured by verified reviews and Rupee symbol.   |

### 2. Sarah D'Souza (Store Admin Persona)

Sarah runs an organic soap boutique and needs an interface that alerts her immediately about running out of product stock.

|                                                                                                      |                                                                                                 |
|------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|
| <b>SAYS</b><br>"I need an easy way to upload product photos and check stock shortages."              | <b>THINKS</b><br>"How can I change product prices without entering details again?"              |
| <b>DOES</b><br>Uploads images via dashboard, monitors total sales, processes orders, updates status. | <b>FEELS</b><br>Empowered by visual metrics, stressed about missing items without stock alerts. |
