

Data Flow Diagrams & User Stories

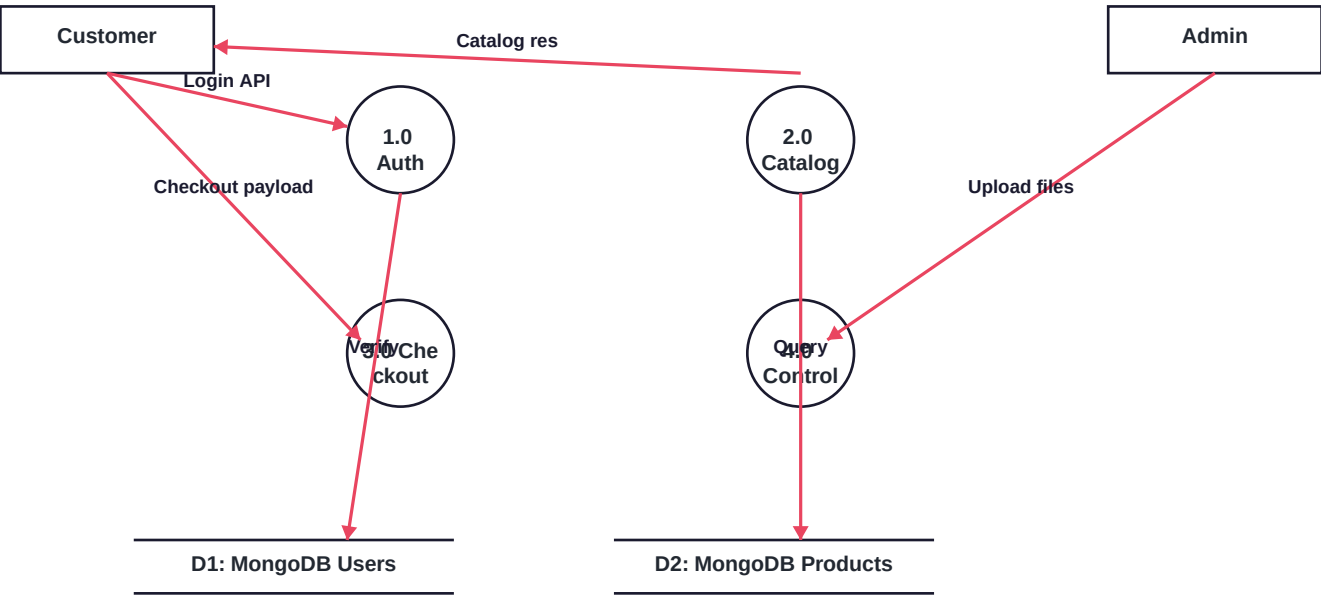

1. Level 0: Context Diagram

Level 0 Context Diagram represents interactions of external entities (Customer and Admin) with the ShopEEZ E-Commerce platform.

2. Level 1: Process Diagram

The detailed Level 1 diagram breaks down processes into user auth, browsing catalog, managing checkout, and admin dashboard updates.

3. Target User Stories

- As a customer, I want to filter products by category and search terms so I can locate specific items quickly.
 - As a customer, I want my items in the cart to survive page reloads so I don't lose my selection.
 - As a customer, I want to see an itemized invoice detailing tax and shipping costs so I can understand my total spend.
 - As a store owner, I want to see visual stock alerts when items fall under critical thresholds (≤ 5) so I can restock.
