

Brainstorming, Idea Generation & Prioritization

Phase: Brainstorming & Ideation

Project: ShopEEZ | Date: June 2026 | Stack: MongoDB · Express · React · Node.js

1. Problem Statement

Existing e-commerce solutions are either too complex for individual sellers or lack the premium user experience that drives customer retention. ShopEEZ bridges this gap by delivering a modern, fast, and visually stunning shopping experience backed by a robust MERN stack.

2. Idea Generation

Idea	Description	Feasibility
Dark-theme responsive UI	Premium look using Vanilla CSS dark palette	High
Redux cart persistence	Cart survives browser refresh via LocalStorage	High
JWT Authentication	Secure login/register with bcrypt-hashed passwords	High
Admin Dashboard	Real-time store management for products/orders/users	High
Live Search & Filters	Filter by category, price range, rating, and brand	High
Product Reviews	Customers submit star ratings and comments	Medium
Cloudinary Image Upload	Image hosting via CDN with local fallback	Medium
Payment Gateway	Stripe/Razorpay live card processing	Deferred
SMS Order Notifications	Carrier text order confirmations	Deferred

3. MoSCoW Prioritization

Must Have (MVP)

- User Registration & Login (JWT + Bcrypt)
- Product Catalog with dynamic MongoDB queries
- Product Detail Page (images, specs, reviews, stock)
- Shopping Cart (Redux + LocalStorage persistence)
- Secure Checkout (shipping address + payment selection)
- Admin Product CRUD (add, edit, delete)
- Admin Order Status Management

Should Have

- Wishlist (LocalStorage-persisted)
- Admin Dashboard Analytics (revenue, users, orders, low stock)
- Product Search + Category / Price / Rating Filters
- User Profile Management (address, phone, password change)

Could Have

- Customer product reviews (star rating + comment)
- Cloudinary image hosting for catalog media
- Featured products section on homepage

Won't Have (Out of Scope for v1.0)

- Live Stripe/Razorpay payment processing
-

SMS notifications for order events

- Multi-vendor marketplace features
