

Problem - Solution Fit

Phase: Project Design

Project: ShopEEZ | Date: June 2026 | Stack: MongoDB · Express · React · Node.js

Problem-Solution Mapping Matrix

#	Persona	Problem	Solution Feature	Resolution
1	Customer	Mobile layouts cluttered on small screens	Responsive Vanilla CSS Flexbox/Grid	Adapts 320px-1440px seamlessly
2	Customer	Cart lost on browser refresh	Redux cartSlice + LocalStorage	Cart serialized on every update, reloaded on mount
3	Customer	Cannot find products in large catalogs	Full-text Search + Filters	GET /api/products with keyword, category, price, rating params
4	Customer	Checkout is confusing & multi-step	Streamlined Checkout at /checkout	Single-page form: shipping + payment in one submission
5	Customer	No visibility into order status	Order History at /orders	GET /api/orders/my-orders returns status per order
6	Admin	Cannot update catalog without developer	Admin Product CRUD /admin/products	POST/PUT/DELETE /api/admin/products endpoints
7	Admin	No overview of store performance	Admin Dashboard /admin/dashboard	GET /api/admin/dashboard returns all KPI stats
8	Admin	Order fulfillment tracking is manual	Order Status Toggle /admin/orders	PUT /api/admin/orders/:id/status updates MongoDB directly

Validation Summary

All identified problems have a direct, implemented solution in the ShopEEZ codebase. No problem is left without a working feature mapping it to a resolution. Each solution has been verified via the User Acceptance Testing (UAT) checklist and live application testing.
